Department, University, street, ZIP code, city, Country

Abstract. These instructions should be read carefully. If they are not adhered to, it could result in delay in publication and/or in sub-optimal reproduction quality. As a reminder, the number of pages of the submitted contributions is two. Longer papers will not be dealt with. Shorter ones may not be informative enough to succeed.

1 Typing Area

Use paper of A4 size, with the following typing area: length: 24 cm, and width: 15.6 cm. The recommended typefont is Times. As a second choice, use Garamond. Only for tables and figures (illustrations) may you use Helvetica, Univers or other sans-serif fonts. Use Roman as default type and keep italics and/or bold for special text parts.

Recommended typefont sizes:

- a. For the title: 18 pts.
- b. For the main text (including headings): 12 pts.
- c. For abstract, footnotes, references, figures and tables: 10 pts.

Settings for the line spacing are: 12 pts. in cases (b) and (c), 14 pts. in case (a).

2 Typographical Style and Layout

Center the title (horizontally) on the page. Leave approx. 1 cm between title and the name and address of yourself (and of your co-authors, if any).

Type name(s) in 12 pts and address(es) in 11 pts. and center them (horizontally) on the page. Use for addresses *italics*.

Type the abstract at a maximum width of 12 cm. Center the abstract (horizontally) on the page. Number section and subsection headings consecutively in Arabic numbers and type them in **bold**, respectively *italics*. Keep headings and subheadings always flushed left. Do not include references to the literature, illustrations or tables in headings and subheadings. Keep two blank lines above a section heading and one above a subheading. Put one blank line under a heading and a subheading. Only if you want to emphasize specific parts of the main text, use *italics*. Otherwise, use Roman.

Start a new paragraph by indenting it from the left margin (and *not* by inserting a blank line), except under a heading and subheading.

2.1 Illustrations

All illustrations should be original drawings or photographic prints of originals. Photographs should be glossy prints. Photocopies are often not good enough and should be avoided. *All* illustrations must be numbered consecutively (i.e., *not* section-wise), using Arabic numbers. Due to black-and-white reproduction, the illustrations in grey levels should be preferred.

**International Symposium on
Applied Electromagnetics
and Mechanics**

Figure 1: The name of the Symposium

All illustrations should be centered, except for very small figures (no wider than 7 cm), which may be placed side by side. Center figure captions *beneath* the figure. Position figures at the top or at the bottom of a page. Place them as close as possible to where they are mentioned in the main text. Please keep in mind the distinction between figures and tables (the latter only contain alpha-numerical characters and no graphical elements).

2.2 Equations

All equations must be centered and be numbered consecutively (i.e., *not* section-wise), using Arabic numbers. The number should be placed on the right of the equation

$$\nabla \times \vec{E}(\vec{r}, t) + \frac{\partial \vec{B}(\vec{r}, t)}{\partial t} = 0 \quad (1)$$

2.3 Tables, references and acknowledgements

All tables must be numbered consecutively (in Arabic numbers). Table headings should be placed above the table.

References to the literature should be mentioned in the main text by an Arabic number in square brackets. List these (in numerical order) at the end of your paper (under the heading 'References').

Brief acknowledgments are allowed. Place them at the very end of the paper after the References (under the heading 'Acknowledgments').

3 'Fine Tuning'

- Do not end a page with a heading or sub-heading.
- Do not end a page with one or more blank lines, except to avoid 'widow' headings and to end your article.
- Avoid starting a page with an incomplete line.
- Keep changes in fonts and style to a minimum so as to avoid a disorderly page layout.
- Do not underline headings, sub-headings, title, figure captions and table headings.
- Make sure that in figures the size of the largest characters and numbers is in proportion to the size of the smallest ones (i.e., alpha-numeric symbols should not be larger than approx. 150% of the smallest ones).
- Keep footnotes to a minimum or else list them in a special section before the References.
